# WAVE RIDER SEAT SPECIFICATIONS

**The UnitedSeats Wave Rider is a Heavy Duty mechanical suspension seat combining the comfort of the UnitedSeats C2 Pro Mid Back seat or C7 Pro High Back seat with a reinforced Grammer MSG85 suspension. This combination is specifically created by UnitedSeats for arduous marine environments.**

It protects against harmful wave vibrations and shocks and provides a modern alternative to the now defunct KAB300 series seats.

The reinforced Grammer suspension has successfully passed:

1. IEC 60068-2-6:2008 environmental testing.  
Part 2-6 tests - Test Fc: vibration (sinusoidal)
2. IEC 60068-2-27:2008 environmental testing.  
Part 2-27 tests - Test Ea and guidance: shock. The shock tests were effected at 3g/6g and 12g peaks.

The MSG85 has a vertical suspension travel of 160mm and has 60mm of height adjustment in 3 steps. The addition of the horizontal isolator also reduces fore and aft wave buffeting.

The C2 Pro and C7 Pro uppers are available in deluxe fabric or waterproof PVC options. The cushion assemblies are easy to interchange, so ideal for repair.

The backrest assembly is fitted by a 4 bolt system that allows the mid-back to be swapped to high back in quick time.

The high comfort level of both versions is enhanced by the seat tilt feature and seat cushion depth adjustment.

Slide rail adjustment provides 210mm of travel to assist seat positioning.

Easy fit options include adjustable armrests, headrest and 2 inch retractable seat belt.

Deluxe options include air lumbar support and heating elements and marine pedestal with footrest.

*Wave Rider C2 Pro  
(mid-back)*

*Wave Rider C7 Pro  
(high-back)*

Our distribution network makes it easy to purchase the seat you're looking for. Please contact us for additional information and pricing.
