UNITED SEATS

Off road seating manufacturer

SEATING AND SAFETY SOLUTIONS FOR FORKLIFT AND INDUSTRIAL VEHICLES

The UnitedSeats range is supplied for off highway uses for the following sectors: Industrial, construction, agriculture, marine and mobility sectors.

All our seats are made for us under contract in a state of the art 75,000m2 modern facility. The seats are tested to the latest European standards. We can provide turnkey installations from quantities of 1 to 10,000 units and from our assembly centre in Holland we can configure seats on a short lead time.

MGV55 AG

Our latest range of forklift seats, called the MGV35 and MGV55 series meet 1T1, 1T2, EN13490, ISO 7096, EM1 to EM3, EM5 to EM9 and is strong enough to take command arms.

UNITEDSEATS DEALER DAYS ARE A GREAT SUCCESS AGAIN

On the 22nd and 23rd May we held our UnitedSeats Official dealer conference in Zwijndrecht, near Rotterdam. 19 Participants representing 12 leading Dealerships attended. These came from France, England, USA, Greece, Poland, Germany, Finland, South Africa, Denmark, Switzerland and Eire.

We presented our latest product, marketing and company updates, gave demonstrations and our

visitors were able to meet and have discussions with our team. Two new brochures (agriculture and

marine) were introduced. We also reviewed the highlights in 2018-2019 of our network's efforts at shows, on websites and in marketing our products.

A review was also made about recent UnitedSeats, OEM progress, aftermarket installations and tips to identify how to refit a UnitedSeat to replace an old or damaged seat on older machines and equipment.

US20: THE IDEAL ECONOMY FORKLIFT SEAT

The US20 is modern and aesthetic looking! The US20 cushions are in heavy duty PVC; these come with more side support on both back and seat cushions. There is an adjustable backrest and adjustable slide rails (width 150-328 mm). Due to this, this seat fits in almost all industrial machines.

The US20 has a 490 mm seat width and is equipped with a 150 mm slide rail travel, 40mm suspension travel, contact switch and weight adjustment up to 120 kg. This low profile mechanical suspension seat is provided with all the comforts you need.

The US20 is also available with options such as armrests and seatbelt. This is an upgrade for users who typically use the GS12 type seat.

RECENT UNITEDSEATS OEM SUCCESSES

For this small loglift crane it was essential to develop an all weather seat with 24v heating intergrated into the vacuum formed cushions.

Nexen forklifts will now use the MGV35 as an option on their range.

The MGV35 is an excellent seat for small vehicles such as tow tractors.

UNITEDSEATS HAVE A FANTASTIC BAUMA 2019 SHOW

The Bauma Show in Munich Germany, is the largest global construction equipment show and held every three years. UnitedSeats is a regular exhibitor at this event which took place in April 2019. Over 600,000 visitors came to Bauma 2019 from all over the world.

Our seating stand was in a prime location and attracted many visitors

from OEM's, dealers, construction companies and end users alike.

On our stand we displayed 14 UnitedSeats suspension seats, and presented two Trone fully electric seats equipped with the UnitedSeats Air LGV120 suspension. We also introduced a new Harita seat by UnitedSeats. This is an air seat with manual air valve, horizontal suspension, swivel device and lumbar support. This is due to launch in 2020.

NEW ADDITION TO UK AND IRELAND SALES TEAM

Michael Hale is the newest member of the United Seats sales team. Michael comes from an education background where for the past decade he worked as a primary school teacher before moving into the sport sector working

as an apprenticeship tutor for a highly respected sports charity in Grantham (UK). His role will be to promote and support UnitedSeats dealers and work with OEM's.

Further options include; Contact switch, Seatbelt, Slide rails, Suspension, Yellow PVC and Grey PVC.

Mi600

SAFETY BELTS FOR EVERY VEHICLE

We can build 3 point seat belt seats for hazardous applications and we have an extensive range of 2, 3 and 4 point seat belts. Most popular of late are retractable, switched Hi viz orange and yellow belts. These connect to green beacons to show the driver is "Belted up". Download the UnitedSeats safety belt leaflet and see our selected range of safety belts.

MGV35 AND MGV55 WITH ERGONOMIC ARMREST AND POD

To enable more ergonomic solutions the MGV35 and MGV55 seat can be fitted with armrests and pods. These seats with appropriate brackets can take command arms on forklifts such as jungheinrich, Linde, CAT and Hyster.
