

# SEAT FABRIC OF WOVEN BOTTLES

OFF ROAD SEATING MANUFACTURER

## LGV95/C8 PRO

**This strong robust air seat for construction machines has the ability to carry operators up to 135 kg in weight.**

It has mounting points that affix wide fully adjustable armrests and mounting pods. These can take various joystick controls. This arrangement provides an ergonomic operator seat that minimises risk of repetitive strain injuries to the hands and arms. All seat adjustments are close to hand and easy to operate.

With the new 'Regain' recycled fabric UnitedSeats can now offer the LGV95/C8 PRO seat for construction machines as a full 'Green-Line' product. Its Green credentials can be seen in this brochure.

Available in 20 colours, including:

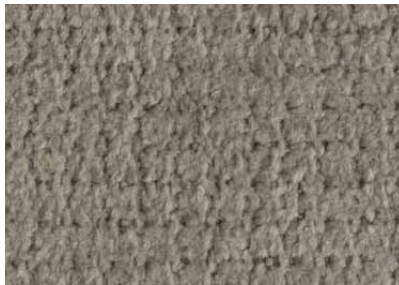

**LIGHT GREY**

**ANTHRACITE**

**SCARLET**

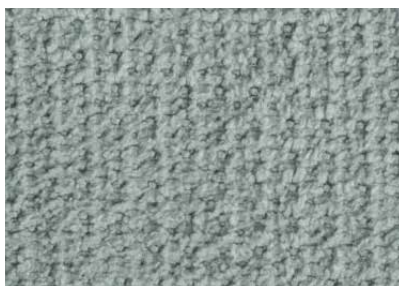

**LIVER**

**EUCALYPTUS**

**CREAM**

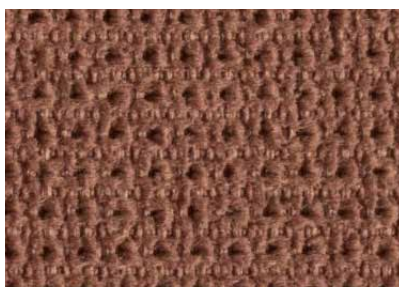

**NIAGRA**

**HUNTER**

**ZINC**

**HAZEL**

**HONEY**

**TAUPE**

## Environmental Product Summary

### LGV95/C8 PRO

**We have to be very careful with the world we all live in. Resources are limited and we need to focus on a better and cleaner world for the next generation.**

Our commitment to corporate sustainability becomes stronger every day and naturally includes minimizing the environmental impact. More and more our seat design focusses fully on the “cradle to cradle” principle, meaning what resources, materials and methods are needed and what impact does these have and can we reuse all the material again. The Green-Line construction seats are based upon this circularity and the seats are up to 94% percent recyclable.

Next to the seat design and manufacturing processes we looked at the fabrics used on these new seats. Durability was always a key feature as well as fire resistance. Seat fabrics need to be comfortable and easy to clean as well. With the new Regain Fabrics® we have found a perfect solution. The “woven bottles®” fabric is unique, comfortable, and creates a fresh look.

“ The fabric is made out of 100% Recycled PET bottles and is a 100% sustainable product. ”

**70%**  
Less energy

**86%**  
Less water

**76%**  
Less CO<sub>2</sub>

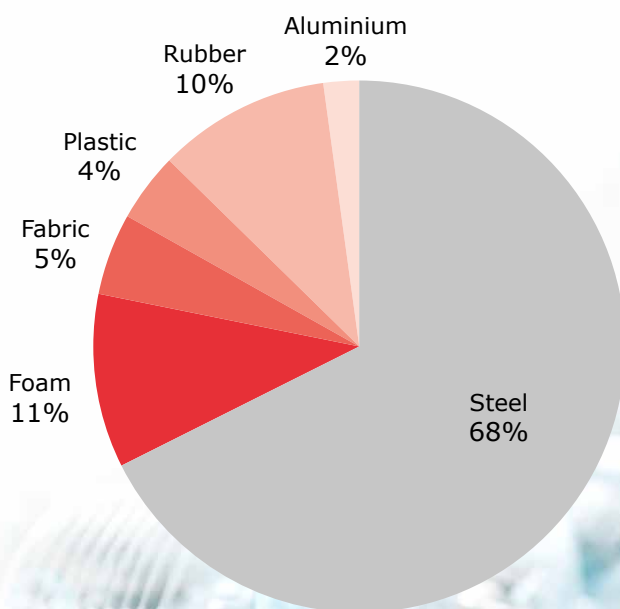

**100%**  
Sustainable material

### Material Content

The LGV95/C8 Pro seat is constructed from steel, plastic, rubber, foam, fabric and other materials. The LGV95/C8 Pro is up to 94% recyclable based on the availability of recycling facilities.

***The seat can be disassembled with standard tools thereby allowing reuse, refurbishment, repair and recycling of components.***

### Supplier Excellence

UnitedSeats is the own brand label of EBLO. At EBLO we are committed to work closely with our suppliers to reduce our collective impact on the environment. We operate a successful packaging scheme with key suppliers. Wherever possible we segregate reusable packaging and use it to send other products. If the material is unusable, we shred it to be used as filling to protect our product during shipping.
