

# RANCHER ELITE LUXURY SEAT

OFF ROAD SEATING MANUFACTURER

# RANCHER ELITE

In addition to our comfortable, air-suspended UnitedSeats Rancher Pro seat, our latest and newest version is now available: the UnitedSeats Rancher Elite. The UnitedSeats Rancher Elite is an air suspended agricultural seat and suitable for large/medium sized tractors. The seat is also suitable for construction machinery and various earthmoving machines. This new version of the UnitedSeats Rancher Pro has a new seat upholstery with a luxurious look and feel. The Rancher Elite has a turntable of 180 degrees which makes it easy and simple to get out of the seat of a vehicle.

Additional features of this Rancher Elite are the DDS and APS system. The DDS system is a smart damping system, which calculates and installs the right damping that needs to be set to properly absorb vibrations and shocks. The APS (Automatic Positioning System) provides automatic driver weight adjustment, especially useful when several drivers use the same seat. Both systems contribute to create the optimal seating comfort.

Last, but not least, is the KLIMA system of this seat: 3 settings for cooling and heating of the seat. With the Rancher Elite you can continue working during hot or cold working conditions by adjusting the temperature of the seat.
