HEAVY DUTY 'TITAN' SEAT BELTS FOR EXTREME ENVIRONMENTS

UnitedSeats is expanding its product range with the new Heavy Duty 'Titan' seat belts, specifically engineered for use in harsh industrial, mining, and outdoor environments. This development follows feedback from customers operating non-cab machinery such as site dumpers, wheel loaders, forklifts, rollers, and forestry cranes, where seats are constantly exposed to rain, sun, snow, mud, dust, and salt.

Designed with durability and safety in mind, the 'Titan' seat belts are built to withstand the toughest conditions. They offer excellent resistance to water, dirt, and debris ingress, ensuring reliable performance even in the most demanding applications. The belts comply with ISO 6683-R16

standards and are SAE-J386 approved for the U.S. market. A key feature is the IP67-rated buckle, which is fully dust-tight and protected against water. Integrated escape vents allow dirt and debris to pass through, making it easy to clean the buckle simply by rinsing it with water-helping

to maintain optimal functionality over time. This ensures reliable performance in harsh conditions. The high-quality webbing is available in black and orange, and the range includes both Automatic Locking Retractor (ALR) and Manual Locking Retractor (MLR) versions.

Available as of June 2026, the 'Titan' seat belts will also be integrated into selected UnitedSeats seating solutions for heavy-duty applications, offering enhanced operator safety and more complete seating systems.

C8 PRO 24/7 OFFICE CHAIR SUCCESSFULLY PASSED TÜV 24/7 TESTS

We are pleased to announce that the top of the range C8 Pro 24/7 office chairs, including the Synergy leather model, successfully passed BS 5459-2:2000+A2:2008. Multiple tests were conducted at the TÜV laboratories in Nuremberg. The C8 Pro 24/7 office chair met all strength, stability and safety requirements across more than 500,000 test cycles.

The 24/7 performance requirements are extremely stringent and assess critical components such as backrest recliner strength and front seat edge strength. Testing also includes seat tilt, gas lift height adjustment, 5-star base durability, control mechanisms, locking systems, forward and sideways movement, and resistance to tilting or overturning. These requirements ensure the chairs are certified for users up to 150 kg in intensive 24/7 environments. Typical applications include emergency services control rooms, surveillance rooms, air traffic control centres and rail network control rooms. The UnitedSeats range features advanced

ergonomic design, including the C8 Pro Synergy 24/7 Office (leather), C8 Pro Office (leather with fabric), C4 Office (leather with fabric) and C1 Office (leather with fabric) models. Combined with the official TÜV 24/7 certification, the C8 Pro 24/7 office chairs, including the Synergy leather model, offer excellent support for users with back-related conditions.

This certification complements the previously obtained DIN EN 1335-1 and DIN EN 1335-2 TÜV approvals, as well as the Crib 5 fire retardancy certification (BS 7176:2007+A1:2011) for the Synergy chair's fabric and leather upholstery.

LGV150 HEAVY DUTY AIR SUSPENSION ADDITIONAL OPTIONS AVAILABLE SOON

Following the successful delivery of the first batch of the all new LGV150 heavy duty air suspensions, our assembly team were quick to build the LGV150/C2 Pro and LGV150/C7 Pro seats for one of our dealers.

The heavy duty suspension, a developmental update on the popular LGV120 air suspension, includes the additions of an adjustable damper, fore/aft suspension and 150 mm of suspension travel for better all round performance, especially in the more rugged terrains found in mining and quarrying environments.

This suspension features 260 mm mounting centres and as with our modular system, can be fitted with a variety of uppers including the C1, C2 Pro, C4, C7 Pro & C8 Pro to suit a host of different vehicles, not only in the heavy construction sector, but in various other sectors.

The LGV150 suspension will be readily available in Q2 2026 so please contact your UnitedSeats representative if you are interested.

INDEPENDENT AGRI PARTS SHOWCASES THE UNITEDSEATS RANGE AT YAMS 2026

The Independent Agri Parts team was joined by representatives from UnitedSeats UK at the latest edition of the Yorkshire Agricultural Machinery Show (YAMS). Held in York in the North of England, the February show faced cold, wet and muddy conditions. Nevertheless, thousands of visitors visited the show to see the exhibitors' latest offerings.

Independent Agri Parts showcased the UnitedSeats range on their stand, where visitors received expert advice on selecting the right seat for their applications. They showed the new LGV95/C1 AR and CS85/C1 AR in blue trim which was also presented in their freshly restored Ford TW-35 that they recently prepared for its owner. The blue upholstery perfectly complements the classic Ford colour.

The show was a big success with the team selling more seats at this edition than the previous three years combined. Whilst at the show, Liam also presented Jay with their

UnitedSeats Bronze Sales Certificate for 2025.

The event was a strong performance by the Independent Agri Parts team.

SUMSERTECH SPAIN ATTENDS FIMA AGRICULTURAL SHOW IN ZARAGOZA

One of our leading dealers, Sumsertech based in Spain, attended the FIMA international agricultural show in Zaragoza. On the stand they showcased a strong range of products from UnitedSeats: Rancher Pro, Rancher Artisan, Highlander Pro, MGV25/C5, MGV84/1050 SM, MGV20, LGV84/C5 and various suspensions and accessories.

The Sumsertech team of Sergi, Jordi, Sergi, Luis and Teresa were supported at the event by Mike and Malik from UnitedSeats. The FIMA is Spain's leading indoor agricultural show attended by over 170,000 visitors from the farming and agricultural communities. Farmers come from all over Spain and Portugal and there were over 1,250 brands exhibiting.

On the stand, Sumsertech also exhibited the Meclube range of oil dispensing equipment from Italy. The Sumsertech stand was busy throughout and we thank Sergi and his team for making such a great effort to represent our brand.

Visitors could also see UnitedSeats products installed on machines across the show, such as the MGV35 installed in

a TYM Excavator and the US20 fitted to Thaler compact loaders. At the event, Sumsertech further strengthened UnitedSeats' visibility in the Southern European market.

SUMSERTECH INSTALLS RANCHER IN NEW HOLLAND TM155 TRACTOR

Our Spanish dealer, Sumsertech, has been busy on the back of a very successful FIMA show doing what they do best, providing excellent seating solutions to their customers. On this occasion, they have once again achieved a fantastic installation of our Rancher air suspension seat into a New Holland TM155 tractor.

The customer was very happy with their new seat. The Rancher did not only refresh the cabin of the tractor, but more importantly provided them more comfort and better support including features such as adjustable damper so the driver can harden or soften the damping depending on the

terrain, 20°/20° swivel and fore/aft for additional absorption when coming to a stop whilst pulling trailers or attachments.

Once again, brilliant work from the Sumsertech team, our reliable partner in Spain for several years.

UnitedSeats Rancher

At UnitedSeats we are dedicated to providing a quality service from the initial quotation to final product delivery. Our commitment to service, knowledge and product availability has made us the preferred source for your seating needs.
